AVYVE's VIP Systems have success at Emory University

Atlanta, GA – February 25, 2005 – Emory University implemented their first AVYVE VIP System™ over four years ago in a small seminar style classroom on the college campus. The Visual Interactive Presenter™, designed and integrated by AVYVE of Atlanta, Georgia has become an integral part of the faculty's teaching style in these small classrooms. The VIP™ incorporates a full range of media including a VCR, DVD, document camera, cable TV tuner, permanent PC and laptop connectivity. These components are then integrated with Smart Technologies 3000i, creating a fully interactive multimedia presentation system. A wireless Crestron control panel provides seamless, intuitive control of the system.

The AVYVE VIP SYSTEM™ is delivered with a custom side cabinet that works well in small meeting and teaching spaces. The Pro model incorporates a lectern, and the high-end VC model has full video conferencing capabilities.

More recently, Emory selected the VIP Plus™ for use in their new Cox Hall Computing Center. This state-of-the-art facility incorporates several small collaborative spaces in which students can connect their laptops to share and review digital media they have developed at the center. A VIP™ was also put into a teaching space within the new Marvin A. Schwartz Performing Arts Center.

About AVYVE:

Established in 1998, AVYVE is a national recognized audio visual system integrator headquartered in Atlanta, Georgia. A team of industry veterans specialize in the integration of a wide range of visual communication solutions for their corporate, medical and higher educational clients, as well as, the homes of their leaders. AVYVE's strict focus is on the design, implementation, training and maintenance of their client's systems. Areas of expertise include boardrooms, training facilities, media rooms, videoconference centers and command control environments commercially. Residentially AVYVE provides whole home automated technologies encompassing audio distribution, lighting control, phone systems, as well as, home theaters, networking solutions and video surveillance.
